Portfolio: 3D-Portfolio

Home: 60000 BEAUVAIS (France)

ABOUT ME

Agricultural data scientist completing an MSc in Agricultural and Food Data Management at UniLaSalle , with an MSc in Plant Biology and Plant Biotechnology. I combine field trials, farm records, weather and soil data to understand how crops respond to their environment, using Python to build data pipelines and predictive models. In my current internship, I study how species, environment and management interact to shape the performance of multi-species cover crops. I am looking for a doctorate where I can link plant science with quantitative analysis to make cropping systems more productive and resilient.

WORK EXPERIENCE

UniLaSalle – Beauvais, France

Data Management Intern – Multi-Species Cover Crop Performance

[23/03/2026 – Current]

- Developed an operational Genotype x Environment x Management (GxExM) interaction matrix to evaluate the dry matter (MS) biomass and agronomic performance of multi-species cover crops.
- Engineered data pipelines and spatial decision to support frameworks (QGIS) to analyze ecological diversity, pedo-climatic environments, and crop resilience.
- Processed, visualized, and interpreted multi-source field sensor and remote sensing datasets in collaboration with project partners Developed an automated method to extract satellite NDVI time series from graphs, with visual quality control, and linked them to farm cover crop records.
- Built and harmonised a multi-environment trial database from several sources (field trials, experiments, farms), linked to daily weather and soil data to envirotype each site-year.

Goverment of INDIA – Chennai, India

Website: https://nirt.res.in/ | **Email address:** nirtdirector.ps@icmr.gov.in | **Name of unit or department:** ICMR- National Institute for Research in Tuberculosis - **Business or sector:** Human health and social work activities

Project Technical Support at ICMR- National Institute for Research in Tuberculosis

[27/12/2023 – 30/10/2024]

- Executed rigorous scientific protocols, molecular detection assays, and biological sample processing for multi-centric research initiatives.
- Managed large-scale scientific and field datasets, ensuring high data integrity through systematic entry, cleaning, and multi-source processing.
- Coordinated multi-centric community and field data collection initiatives, collaborating closely with diverse stakeholders, field workers, and institutional partners.
- Authored and maintained standard operating procedures (SOPs) and analyzed quantitative research metrics to ensure strict experimental compliance and documentation.

Department of Crystallography and Biophysics, University of Madras – Chennai, India

Laboratory Trainee

[28/08/2021 – 30/09/2021]

- Completed a laboratory placement focusing on foundational cell and molecular biology techniques.
- Gained practical experience in protein separation and analysis using SDS-PAGE
- Assisted with the preparation of laboratory reagents, experimental setup, and standard molecular protocols to support biological research
- Attended the Kerala Science Congress, Awarded For work on natural aqua-hydroponics.

SKILLS

Leadership / Data Science / Statistical Modeling

Digital Skills

R (Tidyverse) / Git / GitHub / SQL / Python (Pandas, GeoPandas, Scikit-learn) / Power BI / Streamlit

Domain Expertise

Agroecology & Precision Agriculture / GxExM Interaction Analysis / Geospatial Analysis (QGIS) / Remote Sensing (Sentinel-2, NDVI) / Crop Yield Modeling

Laboratory & Biological Skills

Genomics & Molecular Biology / Plant Tissue Culture / Plant Genetics & Plant Breeding / Algal Culturing / Dry Matter Biomass Evaluation / Digital Phenotyping

RECOMMENDATIONS

Name: Dr. Nicolas Honvault | Research Scientist & Internship Supervisor in UniLaSalle
Direct supervisor for my Master's internship at UniLaSalle. He oversees my daily research, data analysis, and statistical modeling regarding the performance of multi-species cover crops
Email: Nicolas.HONVAULT@unilasalle.fr

Name: Dr. S. Abdul Kader | Professor, Department of Plant Biotechnology Presidency College
Academic mentor and professor during my Master of Science in Plant Biology and Plant Biotechnology at Presidency College. He oversaw my foundational studies in plant physiology and biological research.
Email: sakfri@rediffmail.com

EDUCATION AND TRAINING

MSc Agricultural & Food Data Management
UniLaSalle Institut Polytechnique [15/09/2025 – Current]

City: Mont-Saint-Aignan,Rouen | **Country:** France | **Website:** https://www.unilasalle.fr/ | **Field(s) of study:** Data Science, Agronomy | **Level in EQF:** EQF level 7

MSc Plant Biology and Plant Biotechnology
Presidency College Chennai [05/09/2021 – 14/04/2023]

City: CHENNAI | **Country:** India | **Website:** https://www.presidencycollegechennai.ac.in/

BSc Plant Biology and Plant Biotechnology
The New College [10/07/2018 – 18/04/2021]

City: Chennai | **Country:** India | **Website:** https://thenewcollege.edu.in/

MLT (Medical Lab Technology) Diploma
University of Madras [27/08/2018 – 16/09/2019]

City: CHENNAI | **Country:** India | **Website:** https://www.unom.ac.in/

Good Laboratory Practice
University of Maryland [10/03/2024 – 11/05/2024]

City: College Park, Maryland | **Country:** United States | **Website:** https://www.umd.edu/

PROJECTS

[18/12/2025 – 06/06/2026]
CropAnalyzer: Automated Wheat Phenotyping System Developed a custom hardware-software crop diagnostic tool utilizing a Raspberry Pi. Engineered terminal scripts and programmatic pipelines to perform targeted phenotypic assessment, with a specific focus on the morphological leaf analysis of wheat crops. This system bridges physical field biology with digital analytics, allowing for the automated extraction of crop health metrics and physiological responses to environmental stresses.
